

Braun Swing-A-Way®

Solves the problem of tight parking spaces with parallel boarding and its unique swivelling platform.

The Braun Swing-A-Way creates a unique ability to park close to buildings or narrow pavements as the wheelchair user rolls onto the platform in parallel to the vehicle. The telescopic platform extends to the necessary length as the wheelchair user rolls onto it.

The lifts are fully automatic in operation and operated by a user or care-giver using either the standard handheld control or the controls located on the lift.

Quick facts

- Requires a minimal parking space. The deployed platform protrudes no more from the side of the vehicle than the fully opened front door.
- Does not obstruct normal use of door opening
- Platform handrail provides added security for wheelchair user
- EMC test approved
- Type approved
- CE-marked

To guarantee your safety all Autoadapt products are designed and tested according to current directives and standards.

Specifications

CONSTRUCTION Steel with powder coat finish

OPERATING TEMPERATURE -23°C to +65°C

For your safety, the hydraulic roll stop raises to the vertical position before the platform leaves the ground.
